DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuo et al. (6,226,040).

Regarding claims 1 and 3, Kuo discloses a video converting apparatus showing a video receiving step (col. 8, lines 37-43), a processing step (201), a generating step (250), and a predetermined section or area rescaling step (231). Kuo also indicates that the selected area can be zoomed to any size (col. 4, lines 27-29).

Regarding claim 6, the input video in Kuo is inherently component video signal.

Regarding claims 7-9, the converting means 201 meets the claimed invention.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuo et al. (6,226,040) in view of Sugimori et al. (5,161,020).

Regarding claim 4 and 5, Kuo does not disclose the analyzing and defining steps as claimed. Sugimori, from the similar field of endeavor, discloses a color character area determination means (Figure 2) for detecting areas where text are being displayed. This means meets the analyzing and defining steps as claimed. Kuo teaches that his invention can be used to enlarge selected text (col. 1, line 14). Therefore, in order to automatically select, enlarge, and display text information, such as the closed caption text, on the monitor, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include the color area determination means of Sugimori into Kuo to perform the well known functions as claimed.

Response to Arguments

5. Applicant's arguments filed 12/29/08 have been fully considered but they are not persuasive.

Applicant basically argues that Kuo does not handle motion or moving video frames and instead, it only handles still images. The examiner disagrees. In col. 1, line 40, Kuo states that Microsoft PowerPoint presentation software is being used. It is well known that Powerpoint is capable to handle video clips. For instance, Anderson (U.S. Patent no. 6,683,649) states that video clips captured by a video camera can be presented by the Powerpoint presentation application to an audience through a projector (note col. 2, lines 12-24). Since Kuo employs Powerpoint presentation application, it is fully capable to process video clips according to Anderson. Thus, the rejection still stands.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
